150 (5.90) × 150 (5.90)

150 (5.90) × 300 (11.8)

[Application]

Permanent magnetic chucks to enable highly accurate composite inclination on the X axis and Y axis. [Features]

- ●When one side is closed, the chuck acts as a single vertical or horizontal type.
- The whole sine bar part is made of special steel, which has been precisely ground after hardening.
- The major parts have been lapped to ensure highly precise grinding and measurement over a long period of time.
- Since a thin permanent magnetic chuck is used, this model is easy to handle and provides a wider machining space.
- These chucks employ a permanent magnet and therefore no heat is generated, which enables highly precise grinding

A laterally long type with the long side as the tilting axis for highly precise grinding and measurement.

- ●A flat type as thin as 89 mm to 100 mm for a wide range of applications. With a thin permanent magnetic chuck mounted, this single type has been precisely finished to 0.007 mm or better.
- The whole sine bar part is made of special steel, which has been precisely ground after hardening.
- The major parts have been lapped to ensure highly precise grinding and measurement over a long period of time.
- Since a thin permanent magnetic chuck 🗗 is used, this model is easy to handle and provides a wider machining space.
- ■These chucks employ a permanent magnet and therefore no heat is generated which enables highly precise grinding.

Model SBP-R·L

SINGLE TYPE PERMANENT MAGNETIC SINE BAR CHUCK

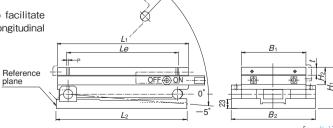

[Application]

A longitudinally long type with the short side as the tilting axis for highly precise grinding and measurement. Suitable for highly precise angle grinding on mold grinders, etc.

[Features]

 A grip is provided to facilitate angle setting in the longitudinal direction

Gauge block not included. [mm(in)]
